

## Student device and internet support

### Device:

If you do not have a device at home to do schoolwork electronically, one can be requested from the school you are enrolled in. Each school has Chromebooks available to checkout. They are only available if you do not have access to a device at home. The parent/guardian and student must sign an agreement before the Chromebook will be issued.

### Internet:

If you do not have internet access at home, Emery Telcom is offering free internet for households with k-12 students that currently do not currently have this access. Any parent/guardian with a student enrolled in any Emery County school may contact Emery Telcom at 435-748-2223 to request an internet connection. An Emery Telcom technician will come to your home and install internet connectivity. They will also make sure your device properly connects to the internet (so please check out a Chromebook before you schedule the installation with Emery Telcom).

Emery School District would like to thank Emery Telcom for their support in our efforts to make sure students have the opportunity to continue learning as we work through these complications generated by the COVID-19 virus outbreak.
